

Ralph Tetta ~ Bio and Resume

Ralph Tetta has been performing standup comedy since 1988, taking his act to 35 different states and one Canadian province. The success of Ralph's act is that he never performs the same show twice, calling on his vast repertoire of written material along with his improvisational skills to craft a one-of-a-kind show for each individual audience.

Ralph has the ability to shift from ripping on current events and items in local and national news headlines to a hilarious examination of his personal life, and being a middle-aged married man with a young daughter, a variety of health concerns and living in an inner-city neighborhood in Western New York, he has no short supply of topics from which to draw comedy material.
